

SURGERY ADMISSION FORM

Date _____ Time _____

Pet Name _____ Client Name _____

1. Nature of Surgery: _____

2. Are there any additional procedures desired while under anesthesia? (i.e. remove small skin masses, clean teeth, check lumps etc.)

3. Are there any special anesthetic or medical needs, such as allergies, heart disease, or prior problems with anesthesia? (please explain)

4. For your pet's safety we require a complete physical examination by our doctor within the previous 12 months. For pets under 5 years of age, we strongly recommend a current blood test. For pets over 5 years of age, we require it. Vaccinations/titers must also be current.

Exam date: _____

Fee if needed: _____

Vaccination dates: _____

Fee if needed: _____

Blood test dates: _____

Fee if needed: _____

Blood test? Yes _____ No _____

5. When did your pet last have any food or water? _____

6. We now have a permanent microchip identification system (AVID). We can easily insert one while under anesthesia and save you the fee for a local anesthesia if done separately. Do you desire this? _____ Fee: _____

7. There is an enamel protectant to apply to teeth and deter tartar. Would you like this done today? (We can not apply if tartar is covering the teeth.)

Yes _____ No _____

8. Number at which you may be reached today: _____

9. Please request a complete estimate if desired before leaving your pet.

Anesthesia safety is a great concern to you and to us. We provide anesthetic alternatives based on your pet's health, age, and breed. We monitor respiration, oxygen saturation, and EKG on all patients, and have an intravenous catheter in place for drug administration, as needed. Additional fees will be applied in the unlikely event of cardiac/respiratory collapse.

Laser Surgery

We now have the option of using a surgical laser unit for surgery. We have found that the postoperative experience is usually much easier on your pet when we use the laser.

The benefits are:

1. Less Pain. The nerve endings are sealed.
2. Less Bleeding. The blood vessels are sealed.
3. Less Swelling. The lymphatic vessels are sealed.
4. Lower infection rate. The tissues are ablated, rather than cut.

There are additional fees charged for the use of the laser, depending upon the degree of difficulty of the surgery, and the length of the procedure. This fee is already incorporated into estimates for feline neuters and declaws.

Your pet's surgery is rated as a Level _____ and the additional fee would be _____.

Would you like us to use the laser today? Yes:_____ No:_____
